

Rayhendra Hanif

General practitioner focused on **cardiovascular medicine** and evidence synthesis.

I connect the bedside with the evidence base — from emergency units and community clinics to systematic reviews and meta-analyses that sharpen everyday clinical decisions.

Profile

I'm a medical doctor trained at the Faculty of Medicine, **Andalas University** (Bachelor of Medicine 2023, Medical Doctor 2025). My clinical grounding comes from the front lines: emergency-unit shifts at RSUD M. Yamin Pariaman, adult and child clinics at Puskesmas Kurai Taji, and volunteer medical work during the floods in Aceh.

What keeps me curious is the evidence behind each clinical decision, above all in **cardiovascular medicine**. I've supported a pulmonology meta-analysis as a research assistant, and I've presented my own work on wearable-ECG detection of atrial fibrillation, visit-to-visit blood-pressure variability and infant pertussis at scientific meetings.

My aim is simple: bring rigorous, up-to-date evidence to everyday patient care, and keep asking better questions along the way. Next chapter: **Jakarta**.

RESEARCH INTERESTS

- Atrial fibrillation
- Wearable ECG
- Blood-pressure variability
- Arterial stiffness
- E-cigarettes & vascular health
- Pediatric infections

Skills

Clinical practice

- Emergency care
- Primary care
- Adult outpatient clinic
- Child outpatient clinic
- Cardiovascular medicine
- Disaster medical response

Statistics & software

- RevMan 5.4
- R / RStudio
- STATA
- SPSS
- Microsoft Excel

Research & evidence

- Systematic reviews
- Meta-analysis
- Evidence-based case reports
- Case reports
- Literature searching
- Poster & oral presentations

Languages

- Indonesian
- English
- Spanish
- Native
- Clinical proficiency
- Basic

Experience

General Practitioner (Intern)

Apr 2026 – Jul 2026

Puskesmas Kurai Taji (Kurai Taji Public Health Centre) · Pariaman, West Sumatra

- Rotated through the adult and child outpatient clinics and took part in emergency-unit management.
- Developed an evidence-based case report on extreme visit-to-visit blood-pressure variability and major adverse cardiovascular events.

🏆 **Outcome:** selected as an oral presentation finalist at the 11th Padang SymCARD (June 2026).

General Practitioner (Emergency Unit)

Feb 2026 – Apr 2026

RSUD M. Yamin Pariaman · Pariaman, West Sumatra

- Assessed and managed patients presenting to the hospital emergency unit.

Research Assistant (Pulmonology)

May 2025 – Nov 2025

Office of dr. Fanny Fachruricha, Sp.P(K)

- Ran literature searches and helped prepare a meta-analysis.

Medical Volunteer, Flood Response

Volunteer

Aceh, Indonesia

- Volunteered on the front lines of the medical response to the Aceh floods.

Research & presentations

11th Padang SymCARD · Jun 2026

Surviving Yo-Yo Hypertension: an evidence-based case report on the prognostic impact of extreme visit-to-visit blood-pressure variability (VVBPV) on MACE

Evidence-based case report asking whether extreme swings in blood pressure between clinic visits predict major adverse cardiovascular events. Co-authored with Muhammad Ihsan Nabil Fadhlurrahman.

Evidence-based case report · Hypertension · BP variability · MACE

HOPECARDIS · 2025

The future of atrial fibrillation detection: a systematic review and meta-analysis of wearable ECG accuracy and its role in anticoagulation initiation

Systematic review and meta-analysis of how accurately wearable ECG devices detect atrial fibrillation, and what that means for starting anticoagulation.

Systematic review · Meta-analysis · Wearable ECG · Atrial fibrillation

Pediatric Update & Q-SPA · Dec 2024

Pertussis in an unvaccinated, almost 2-month-old baby: is timing everything?

Pediatric case e-poster on pertussis in a young, unvaccinated infant and the role of vaccination timing. Awarded *Juara Harapan 1* (first honorable mention) in the e-poster competition.

Case report · Pediatrics · Immunization · Infectious disease

Clinical research · Cardiovascular

Blood pressure and arterial stiffness in conventional versus electronic cigarette smokers

Research comparing changes in blood pressure and arterial stiffness between people who smoke conventional cigarettes and those who use e-cigarettes.

Arterial stiffness · Blood pressure · E-cigarettes · Preventive cardiology
